Microscope Tripod for Carl Zeiss

We make it visible.

In the field of stereo microscopy or material microscopy flexibility on a stable construction has a very important meaning. Therefore the OLPE Jena GmbH produces solid solutions, customized on the individual need of functionality, variability and stability.

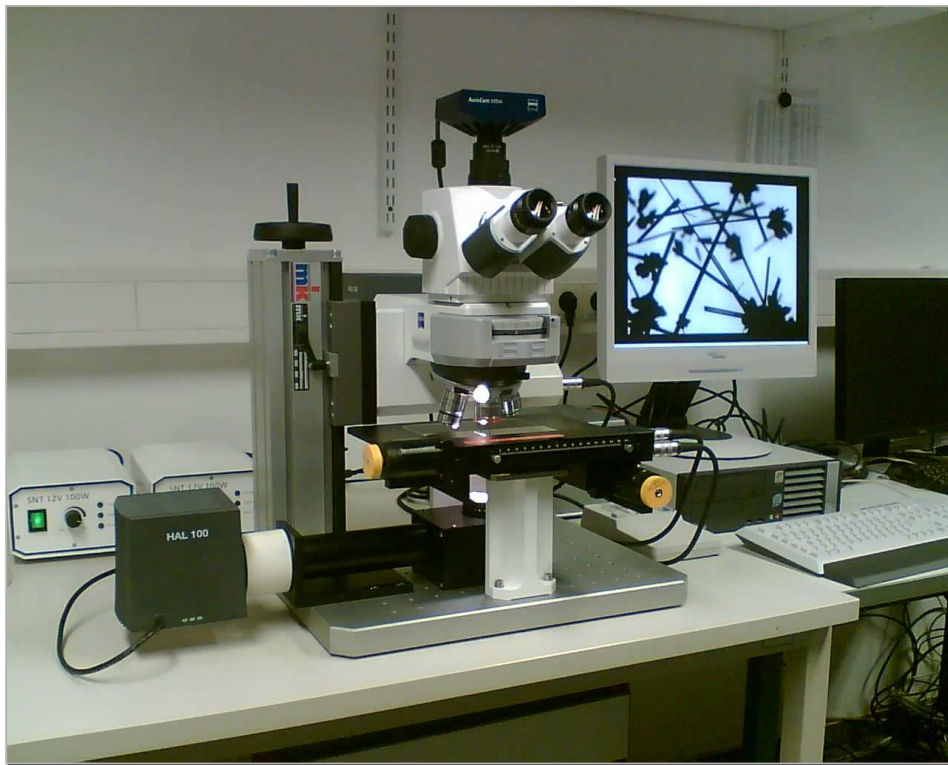

Fig.: Microscope AXIO Scope vario with a transmitted light unit for the analysis of silicon nitride and silicon carbide inclusions. In addition to the tripod AXIO Scope vario 380 mm the OLPE Jena has provided the coupling for the transmitted lighting. More information is available under www.zeiss.de
